beginner friendly. Good piece of software. I am using it on multiple machines and it got all my drivers up to date. I used it because I never update non GPU drivers and thought it was about time to get them back into the present; it worked and I experienced no issues whatsoever.. How to play this game:

1. Install game
2. Uninstall this game

Now you are best player in this game

PLEASE REMOVE THIS "GAME" FROM STEAM BECAUSE IT MAKE SHAME TO STEAM. A good documentary xD. Simple game, small game, it's a game, can't say it's good, can't say it's bad, it just "is".. Best version yet. If you are new to the game, it might take a few seasons to start getting familiar with things, but it will be worth it.. Surprisingly fun, it's simple but altogether with all the dynasties it has a lot of variety. Easy to begin and so entertaining, once you start playing you just can't stop.

Pros: It is really a lot of fun, it has a lot of different characters with their own style of playing each one and the all stars mode is just terrific.

Cons: It is more enjoyable with a controller, you can play it and have a lot of fun with the keyboard. But if you do have a controller you should use it in this game.

8/10

I have tested a few programs (free or trial versions) and none of them recorded Battlefield very well but would work fine for every thing else. This one is great. I can easily record with a simple push of a button with on screen numbers (that you can set to not show up in your video but you can see them while recording) Great software!

Some bugs... It some times crashes my games but that might be my computer in some way. I know it is something to do with this though because as soon as I press the record button the game crashes. I have to restart the program to get it to work again. I did notice that there is a sign of when it will do that. When pressing the button, if it does not start recording even after pressing it and then again a second time, just restart it because that 3rd time will crash your game. Again I am not 100% sure if this is my computer not running it properly but it is linked to this program. This crash was fairly rare and tolerable for the outcome of the videos that I later made into a video.

Another complaint is that I have to have steam on to run it... I was trying to lower my cpu usage even if just a bit for testing but I had to have steam run as well. Even with these though I would still highly recommend this program to those who want to record their games. I think it is better than Fraps (by far). Better quality for sure.. Considering the \$1 I paid for it, Hamilton's Great Adventure isn't a bad little puzzle game. It's charming, it has nice graphics and the puzzles are pretty straight forward. The gameplay consists of traversing a map from point A to point B, while dealing with things such as switches, conveyors, gates, etc. that limit your movement. Your tools to deal with this are limited to add to the challenge. That's really all there is to it!

So like I said, it's simple but it's not bad for a cheap little time waster. Especially if you got a 90% off coupon from badge crafting. The controls can be infuriating at times; Hamilton doesn't turn as responsibly as you'd like him to sometimes which leads to restarts of levels for stupid reasons. Given time though, you can adjust to these mechanics issues and still make for a nice way to kill 10 minutes at a time.

They're attempting some kind of story to go along with Hamilton's little adventure here, but considering he and his granddaughter speak in grunts and coo's, I uh...could care less about that.. The game itself is great. It's Dirt Rally on steroids. Car physics on loose surfaces are brilliant, tarmac is much better though not THAT good, car selection is decent, sound is amazing (as always in Codies games). And those stages!.. After the Dirt 4 generated ones, the handcrafted stages of DR2 feel even more magnificent. Of course, there're FFB issues, inconsistent AI times sometimes breaking WRs, some rare game crashes -- but none of those are gamebreaking.

Personally, I dislike the new copilot, and the career is lacking compared to D4, but that may be just me. New economics system along with lack of liveries, absence of snow stages and some other minor highlights deserve some attention too, but I'll get to that later.

The reason for this review being negative is the dreaded RACENET ISSUES!

Each and every mode which earns you ingame 'credits' to buy and upgrade cars and train your crew is tied to online service called RaceNet. And that RaceNet has ISSUES. It's not as bad as it was in the very beginning for us early players, but still. Sometimes you can't connect to RaceNet, and you get an automatic DNF -- very disappointing to get that on the last stage of a hard event. And just now my career championship got reset due to 'discrepancies' between the local savefile and the RaceNet one -- AND THAT IS FOR THE FOURTH FRIGGIN TIME!

I like the game. I will play it more and eagerly wait for those DLCs. But I do not recommend it, cause I don't expect this RaceNet \$hit to get much better. Remembering the D4 and how it's support got shut down pretty soon after the release further postpones reconsideration of this review to at least end of March.. Bought for .21 cents Sold cards for .30 cents would jew again. A simplistic 2D side scroller which may prove mildly entertaining thanks in large part to its distinct visual style and ridiculous plot.. Bought this game for multiplayer. Multiplayer doesn't work, at least not without port forwarding (seriously?). It's not 1996, your game should allow multiplayer over dynamic/uPnP like every other single multiplayer game on steam. The game selection seem decent but calling this online co-op/Online Multi-Player game is a stretch at best.. This is a very funny, lighthearted game with unique art style that reminds me of Tim Burton's early concept sketches. I was a little turned off by the controls in the very beginning, but you get used to them after a while.

The puzzles are very intuitive most of the time, and when they are not, hints are right there in the game menu, no walkthrough googling needed.

I really think fans of less hardcore, quicker adventures that are more funny than challenging should give it a try.. I really love this little indie game!

As the description says you drive a tank in a TRON-like computer system. The missions you have to fulfill have a very wide spectrum, so you will not get bored with always the same routine like in other games. You can also upgrade your tank with very

cool new weapons.

I recommend everyone to try at least the demo!

Btw there is a Tank Universal 2 in developement, but because the Team behind this game is only one person it will take a while until you see a sequel. More sales might shorten the time for release. ;-). The options menu Is dreadful.

The game its self feels unbelievably repetitive after you walk throught the fifth door or so. Not worth the Price. Don't buy this unless you don't mind losing out.. Local only, game has no community and its day 2 :(
