So far, its a dark twist on a bunch of well enjoyed games. Really like the dream\nightmare aesthetics (things don't make a ton of sense but in a good way). There are some weird collision moments but besides that, I'd say the game is pretty polished.

1st level- this level takes place in a hotel with murder monkeys being the enemies. The hallways feel claustrophobic but that's a good thing. The game sort of plays out as a first person game of Pacman. As you can't see everything, its really important to listen closely to what direction the monkeys are coming from.

2nd level- takes place in a school. cool look to the school. probably not quite as good as the monkey level. The enemy for this stage is Agatha (demonic school girl thing). The game plays like a really messed up version of hide and go seek. My experience was that you could just boost past her so she was a little less challenging than the monkeys. the second stage to this level makes the school a lot more creepy which is nice. the main demon, Malak, shows up at the end and kinda diverts attention from Agatha but, overall, it's pretty good

3rd level- takes place at a mansion and a hedge maze. the enemies are living statues. really cool location with tons of traps to watch out for. enemies play sort of like red light green light. their basically weeping angels. overall, really fun. I wish there was some big final boss but it was Malak again which was a bit disappointing. Would have been cool to be chased by a giant statue or something lol

overall, really fun game. worth playing.. Less a game and more an interactive visualisation. With the right tracks, this is quite meditative. Reminds me very much of 'fIOW', but in psychedelic space.. This is a very intriguing little visual novel. It is based around a man who has just been to his mother's funeral. Going to his old moping spot, he comes across a girl named Lily. They talk, but something feels a bit off...

There is only one choice in the game, both choices are tied to achievements you would receive upon completing the story after each one. Play through and find out the secrets behind Lily.... This is a pretty fun and neat little game. I enjoy horror games, even though I'm jumpy as hell, and this one really got me a couple of times haha. I enjoy the story and the puzzles of really having to look around and focus on everything. Although there was a puzzle in Chapter 2 that didn't make any sense to me, involving a room with a raven carved into the wall. I finally had to give in and look up a walk through, but overall it's a fun game. I was able to get it on sale and I'm happy with my purchase.

If you would like to watch some gameplay, feel free to check out the gameplay series I did on my Youtube channel. Enjoy my jumps and screams haha.

<https://www.youtube.com/watch?v=WEmbDk6KBzw>. I've spent a good few hours playing this game, and imagining myself in a

sort of Tron-like environment racing through the tracks appropriately themed.

Pretty fun minimalist vector-style racing game. It's very Wipeout-ish (weapons while racing and the like), trading one set of fancy graphics for another set of fancy graphics. Great to play when on a trip.

Did I forget to mention online multiplayer?. Great game, I'd love to see more improvements with the shooting mechanics. Rifle sway is a little too hard to control but manageable. Translation is iffy, but nevertheless a solid work in progress title.. This is an example of how not to make a spaceship shoot-em-up. No real story. You play a 20 second section of a level, with some obtuse objective the creator made up. If you fail, which you usually will many times, you have to replay it. If you beat it you play the EXACT same section but with a different obtuse objective. The shooting is bad, the ship moves with lag and in a choppy manner, the field to move is way too small. Usually the level involves using an ability that requires you to kill 3 straight guys, or beat in certain amount of time, etc. This means if you miss killing 1 guy or 1 boost ring you lose it, because.....bad game. So this involves replaying same sections and memorizing when rings and enemies come, because they only stay on screen for about 2 seconds. Randomly the game goes top down, and can be quit annoying. The controls are bad and mixture of keyboard mouse. You can't look at them in game. No video options. No controller support. No good.

3/10,. The plot is so attractive and moving. The art (I refer to the sprite particularly) is good enough, but to be frank I don't like that kind of style. As for the program, I can't read the text by mouse scrolling down. The "Enter" key on the the number pad doesn't work, either. Besides, when the choices occur, the "menu" disappears so that I can't save it. (Tip: You can press the "S" key instead to save.) The music used in the common route may be so-so in my opinion. However, I like the music used in He Lin route because it fit the atmosphere well.

I think you can have a try of this visual novel for its wonderful plot.

when you have nothing to do you can play this game.

No achievements. no level info (how much there will be?). no timer (why pause?)

pretty the same as the games of this kind - at least here you should drag&drop cubes:)

. **Head Shot: A game where grenades are over-powered... and you have 20 of them**

This game is terrible.

I am lucky to not have bought this but instead receive a key for this game free of charge.

There is plenty of things wrong with this game (view models, hud, pause menu, layout, hackers, everything else)

At times it's so stupid it's not even fun

If you are, for some reason, considering to buy this game then please don't.

. The idea is solid, the execution... not so much.

Making movies sounds cool, except you can't really see or understand what you're doing half the time, and the things you do understand seem pretty bad. Making the poster comes off like something from a 3rd grade art project and when I tried to upload an image myself, the game crashed.

Maybe it can be fixed... but I doubt it.

I'd stay away.. A story of a romance between two girls, sad in some parts but heartwarming in others, im sure there are many more similar IRL .

Its pretty much straight forward, so, there are no choices or multiple endings, but still, interesting story if you like this kind of adventure.

Ive been looking for this kind of adventures in this past weeks, since its good sometimes to take break from action most games offer, and im always down for a good story, and this definatly provide one, I recommend this to everyone who enjoys a good story.. "Do you recommend this game?" HELL YEA!

This is one of those games thats so broken and derpy that it is absolutely amazing.

you could say its the "Special Snowflake" of BR games, but I tell yoo whut! its by far worth the whole whoppin .99 to buy.

20/10 Recommended especially for .99 c.. 4/10

The gameplay got extremely repetitive fast. I'd say the company ave it a fair crack as it looks quite nice but....It's quite Boring.

Worth a shot to waste some time if you have nothing better to do but I couldnt recomend it as a game saddly.

Still I will point out that I loved the look of the veichles upgrades and cars
