The application is all you need to sign, approve, or authenticate documents on your PC. The software features a combination of the latest graphic editors with an advanced document signing engine. On the whole, it provides you with all the tools you need to have seamless access to your digital signature toolbox on any digital platform. Alongside this software are all the necessary tools needed for creating graphic documents, including WYSIWYG-style editing tools and powerful vector graphics for use in presentations and reports. Flexisign Pro 6 is equipped with everything you need for document signing on modern computers and devices. Flexisign Pro 6.5 is a natural evolution of the existing software product. The latest release introduces major changes in the user interface and an improved workflow design contributed especially by extensive research and user feedback. An important new feature is "smart autocomplete", which will help you work faster and save time in getting your signature on paper or on screen.

Flexisign Pro 6 is a high-end digital signature software that offers a wide range of features for signing documents or creating graphic IDs with ease and efficiency. The core feature of the toolset is the automatic conversion of text into graphic images for secure digital signatures, ensuring full compatibility with signature pads, including those from FlexiSign. Flexisign Pro 6 supports the following formats:

The product has received multiple awards including the prestigious "Best of Intertech Awards" in 2016 when it won in both the category of Signature Capture Software and Identity Management Solutions. The award for Signature Capture Software was given because of this program's ability to integrate with other applications, allowing users to create signing pages that can be used by end users across all kinds of devices. The award for Identity Management Solutions was given because it allows organizations to secure digital identities through its certified means, which include PKI (Public Key Infrastructure), certificates, digital signatures, and encrypted files. Flexisign Pro 6.5 is supported by an extensive after-sales service which includes phone and email support. The phone line is 9:00 AM to 5:00 PM Central European Time (CET) Monday through Friday, excluding public holidays; and 9:00 AM to 12:00 PM (EET). Support via email and other online services are available 24/7, world-wide.

The latest release was introduced by Intertech Solutions AB at the Contact conference in October 2018. It introduced several new features to the product, including:

Flexisign Pro 6.5 is offered in three versions: Basic, Standard and Professional. The basic version is designed for small businesses and includes a powerful document signing engine with signature capture functionality to convert traditional text into graphic images for digital signatures. The standard version expands on the basic one with a wide range of additional features that enhance the efficiency of users when managing their digital identities and secure document signing processes. The professional version further improves upon these tools with additional organizational features to manage the digital identity lifecycle from start to finish, providing you with all the information needed from initial request through revocation.
